

SILENT TRACK
CURTAIN SYSTEMS

Silent Gliss

THE SOUND OF SILENCE

 **SilentGliss**

The silent revolution

Silence just got even quieter with the new Silent Track range. Resolutely architectural, specially designed tracks married with unique, 2-component (2C) gliders, resulting in unprecedented quietness.

Think of it as a reboot of Silent Gliss founder Alexander Weber's game-changing innovation from 1952, which set the bar for noise-free curtain-track performance. A number of patents later and Silent Gliss has taken another major step forward with its latest Silent Track range.

Hard component
for stability

Soft component
for noise absorption

OPERATION SOLUTIONS FOR ALL SITUATIONS

With our versatile curtain track systems we offer individual solutions for every need. Whether hand, cord or electrically operated, bent and recessed or as a room divider element; curtain track systems offer numerous possibilities for individual solutions. In addition, the Wave curtain heading creates a smooth, continuous 'wave' effect.

2-COMPONENT (2C) TECHNOLOGY

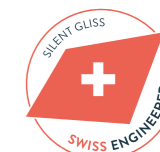

The premium 2C gliders and rollers (patent pending), combined with the specially coated tracks allow the curtain to move smoothly and silently. The gliders are manufactured using 2 materials, a hard component which ensures stability and a soft 'filling' to absorb the noise. The end result is unprecedented silence.

DIFFERENT TRACK DESIGNS FOR DIFFERENT TASTES

The systems are available in three sizes (S, M and L), with the track profiles coming in range of forms – square, round, oval, rectangular and funnel-shaped. Colour customisation is also an option, making a functional piece of design a truly noteworthy design element.

THE FUNNEL

A new track design to draw attention in any room. The elegant and symmetrical funnel-shaped profile features the refined 'click & fit' mechanism which makes it particularly easy to fit.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatment systems.

With cutting edge technology and a relentless commitment to precision, we develop and manufacture the world's quietest, smoothest-gliding curtains and blinds.

Driven by our customers' needs, Silent Gliss provides bespoke curtain and blind systems complemented by expert technical advice, installation and support services. Silent Gliss stands for innovative solutions, exceptional design and outstanding quality. Swiss engineered since 1952.
